

## **Agenda Commentary**

**Item Title/ Subject:** City of Clinton Telephone Service Update with AT&T

**Staff Source:** Gene McCullough, IT Director

**History/Background Information:** AT&T in efforts to provide better and more reliable service is offering fiber optic install to both City Hall and the Fire Station.

**Item/Subject Summary:** Working with a third party AT&T contractor, American Telecom and Technology.com, the City's phone services will be delivered over fiber optic media to our facilities, and include a 10M Internet connection that will be a solid fail over for our main Internet connection.

**Price/Cost:** No install costs, with consolidation of analog lines into the new services, approximately \$450+ a month savings to the City's operations budget.

**Recommendation:** I recommend that you approve moving forward with signing contracts for 3 year service on City Hall and Fire Station services. Analog lines that must be retained will be on an annual contract.
