

The City of Clinton is updating its' 20+ year-old communications system. Technical staff have tested and evaluated our current equipment inclusive of coax cable and antennas. They have determined that the current system does not provide safe communications for the first responders that rely on Clinton Dispatch. The current system runs on analog; whereas the updated system will be digital. This will provide a much safer and higher quality communications. Clinton PD is also providing dispatch service for the fire and ems departments in Arapaho, Custer City and Butler. Combining the Fire and Police dispatch in Clinton, a project that will enhance the safety and efficiency of staff, has uncovered the deficiencies of the current system being utilized.

Arapaho, Butler and Custer City have purchased new Motorola handhelds and mobile units for the aforementioned reasons. Some of the new digital technology is proprietary to Motorola; therefore, Motorola is the system of choice. Total radio has the ability to provide the quality of service that the public safety entities require. Total has also been the lowest bidder on other equipment purchases. Repeaters and duplexer equipment, at the 28th street water tower and in the communication room at the PD, will be replaced.

The next step will be to upgrade the dispatch center in Clinton PD. Staff is of the opinion that the Motorola communications system is the best use of the taxpayer dollars as it provides a quality of communications that the City of Clinton and surrounding towns have never had before.

A handwritten signature in black ink that reads "Brett A. Russell". The signature is written in a cursive style with a large, sweeping initial "B".

Brett A. Russell, Fire Chief

City of Clinton
