

Clinton Regional Hospital

Clinton Regional Hospital
100 North 30th
Clinton, OK 73601

September 20, 2023

To Local Community Emergency Command Authority:

It is the desire of Clinton Regional Hospital to interact and work collaboratively with the local community emergency command authority to consider the available resources and expertise to offer during a community-wide disaster and to include the hospital in advanced planning and response/recovery coordination.

In general, it has been a common practice to include hospitals in responding to disasters or when conducting community drills and training to prepare for disaster response. We recognize that hospitals are typically the primary responder in a community disaster, we also recognize that the hospital will serve as primary responder in a full scale disaster is at a major or catastrophic level, experience is teaching us that hospitals can indeed play a role beyond the scope of traditional thinking. Preparedness is key for us to care for the community we serve and networking with you is vital to that preparedness.

The Centers for Medicare and Medicaid (CMS) have established Conditions for Coverage requirements for hospitals effective May 18, 2009. According to the Conditions, hospitals are required to meet standards for disaster preparedness activities including exercises, and interact with communities in the area of bioterrorism and disaster preparedness. The requirement is as follows:

§416.41 Condition for coverage--Governing body and management.

(c) Standard: Disaster preparedness plan.

(1) The hospital must maintain a written disaster preparedness plan that provides for the emergency care of patients, staff and others in the facility in the event of fire, natural disaster, functional failure of equipment, or other unexpected events or circumstances that are likely to threaten the health and safety of those in the hospitals and/or ASC.

(2) The hospital coordinates the plan with State and local authorities, as appropriate.

(3) The hospital conducts drills, at least annually, to test the plan's effectiveness.

The hospital must complete a written evaluation of each drill and promptly implement any corrections to the plan.

We are asking you to review the following checklist that is intended to provide specifics regarding the facility and its services, along with the attached documents and emergency plan of Clinton Regional Hospital. This is to assist in determining what resources and capabilities of the hospital can be deployed to help in contributing to meet the needs of the community during a community-wide disaster. You are asked to provide a response within 60 days on how the services of Clinton Regional Hospital can be incorporated into the community-wide emergency plan.

Information about Clinton Regional Hospital

1. Clinton Regional Hospital
100 North 30th
Clinton, OK 73601
2. Telephone number: 580-547-5128
3. Emergency contact telephone number: Clint Honeycutt, RN ER Director
4. Email address: Clint.h@crhaok.com
5. Year center was built: 1970
6. Type of construction: Type II (000) Fully Sprinkled
7. Date of any subsequent construction: n/a
8. Name of Administrator: Mike Thomas, ICEO
918-916-5802
 - ❖ Alternate contact persons:
 - ❖ Name: Clint Honeycutt, RN ER Director 580-210-8321
 - ❖ Name: Janae Chittum, RN CNO 580-331-7523
